<b>GERMANY</b>	Equinix	FR2
	e-shelter	Frankfurt 1
<b>US</b>	Equinix	DA1
	Neutrality	1301 FANNIN, HOU

# CONNECTING EUROPEAN CITIES TO THE NORDICS

Tampnet Carrier is all about connectivity, capacity, speed and milliseconds – data transfer with minimum delay - without compromising quality and reliability

Tampnet Carrier connects European cities to the Nordics over its high capacity, low latency network in the North Sea. Underpinned by its wholly-owned, diversely routed subsea cables between the UK and Norway the unique network extends into seven countries, 30 core data centres and 12 markets throughout Europe.

Tampnet Carrier proudly supplies vital connectivity for data centres, carriers, media and financial services companies.

Tampnet Carrier originated from the offshore network that Tampnet has developed over the years. The very stringent availability, quality and security requirements of communication offshore have been incorporated into Carrier business.
